

Press Release

Work begins

Refurbishment work at Rainhill Village Hall has started! The Central Heating boiler is being replaced and the heating system upgraded, and the fascias and soffits are being replaced.

Rainhill Village hall is well used by local residents and they will enjoy a much improved facility thanks to a grant of £28,000 from the funding body WREN.

The money, awarded by WREN's FCC Community Action Fund, is being used to replace the boilers and upgrade the heating system to make it more efficient, economical and make the hall more comfortable for hall users. The appearance of the hall will also be much improved by replacing the soffits, fascias and gutters.

Rainhill Village Hall Management Committee believes that having a reliable and efficient heating system will make a huge difference to the Hall users. It's fantastic that WREN has awarded us this money and we are looking forward to the improvements taking place over the next few weeks.

WREN is a not for profit business that awards grants for community, biodiversity and heritage projects from funds donated by FCC Environment through Landfill Communities Fund.

WREN Spokesperson Quote.....

The Management Committee hopes the improvements will be completed by the end of April.

Rainhill Village Hall is a Charity and is mainly run by volunteers. We are in the process of redecorating all the rooms, but the hall requires some major refurbishment that cannot be carried out by volunteers.

We are very grateful to have received the funding from WREN as it has given our fundraising efforts a huge boost and enabled us to carry out much needed improvements.
